Fermented Dairy Foods

Many fermented dairy products are a good source of probiotics for good health. Probiotics are friendly bacteria in our digestive tract.

**Potential Health Benefits**

- Improve lactose tolerance
- Maintain a healthy digestive tract
- Strengthen the immune system

**Sources**

- Yogurt
- Frozen Yogurt
- Yogurt Drinks
- Kefir
- Some Cottage Cheeses
- Cultured Soy Products
- Sweet Acidophilus® Milk

**Foods**

Foods are better choices for probiotics than supplements because they have components that may work together to give a bigger health effect than taking probiotics alone.

Fermented and cultured dairy and soy products are also a source of calcium, riboflavin, vitamin B12, potassium, protein and other nutrients.

These nutrients may be partly responsible for some of the health benefits of fermented foods.
Ways to Eat More Probiotics

**Spiced Mint Yogurt Drink**
(Adapted from “The Spice of Vegetarian Cooking,” by Martha Rose Shulman)

Serves 2

Ingredients:
- 1 cup yogurt or buttermilk
- ½ cup water
- 12 mint leaves
- ½ teaspoon cumin
- 8 ice cubes

Directions:
1. Blend together all ingredients except ice cubes in a blender until smooth.
2. Add ice cubes and continue to blend another 20 to 30 seconds. Pour into glasses and serve.
